MyMini Dashboard

John Bartlett
Max Hack
Ethan Cuthrell
Aidan White

Description

What is MyMiniDashboard?

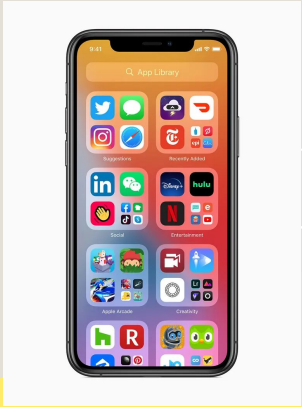
- Collection of smaller “mini-apps”
- Emphasis on interaction between users

Why?

- Broad appeal
- Many features under a single application

From a developer perspective:

- Try many different things on a small scale



Mini-Apps

Snow Report

View snow conditions at popular ski resorts, as well as save dates to their profile for friends to see.

Trading Tracker

Look at popular stocks, including Disney, S&P500, and many more.

Recipe Finder

Find the ‘Recipe of the Day’, search through hundreds of other recipes by their country of origin, and more.

Tools Used

Project Tracker: **GitHub Projects (3)**

VCS repository: **GitHub (5)**

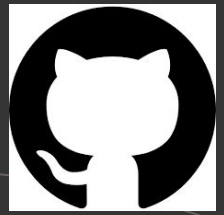
Database: **PostgreSQL (5)**

IDE: **VSCode (3)**

UI Tools: **HTML (5), HandleBars (4), Bootstrap (4), CSS (5), JS (4)**

Application Server: **NodeJS (5)**

Deployment environment: **Render (3)**



Tools, continued

External APIs: **Alpha Vantage (4), TheMealDB (2), Open-Meteo (3)**

Testing tool: **Mocha (2), Chai (2)**

Additional tools: **Docker/Docker Compose (5), Axios (4)**

Framework: **Express in Node (3)**

axios

THEMEALDB

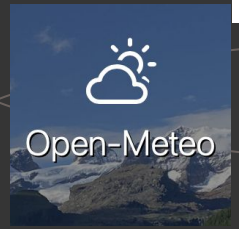
ALPHA VANTAGE

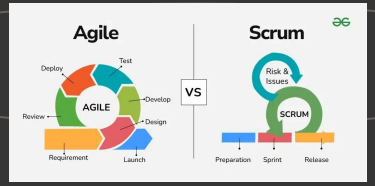
docker

METHODOLOGIES

Agile

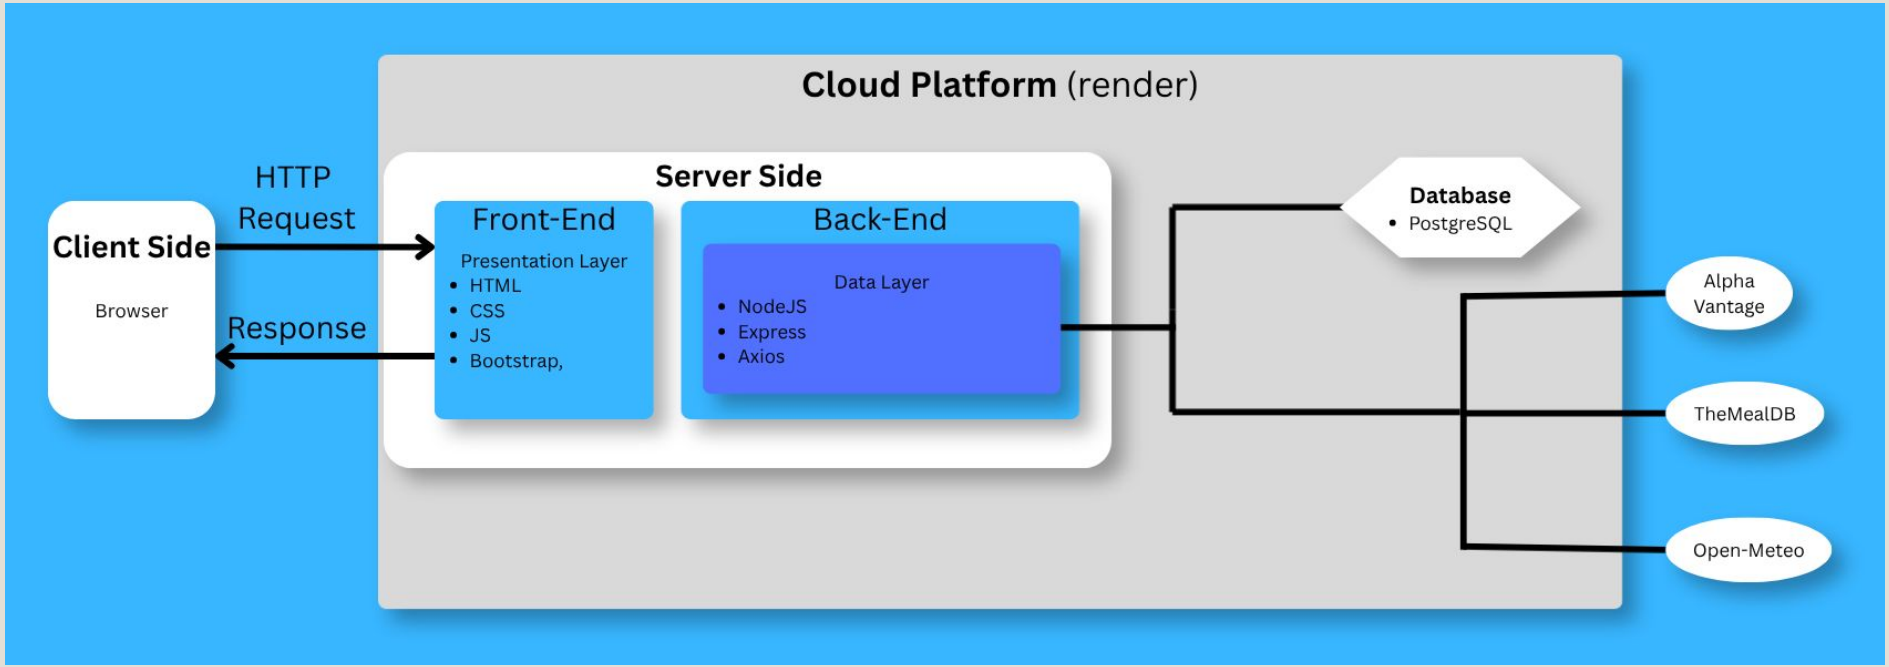
- Kanban (3)
  - GitHub Projects
  - Manage and distribute workload
- Scrum (4)
  - Frequent communication online
  - Weekly afternoon meetings with TA in CSEL





Express JS

Project Architecture



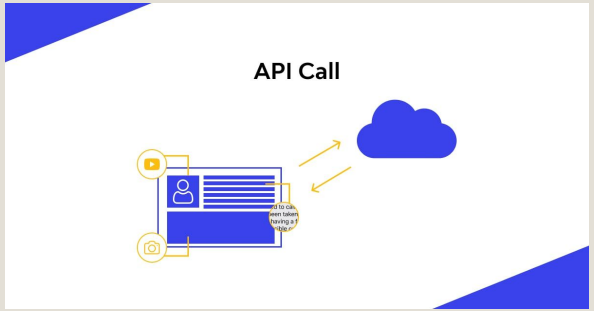
Challenges

API Issues

- Limited requests per day
- Figure out multiple API's

Solution

- Distribute work among group members
- Communication
- Changed which API's used and how they were utilized



Defining Project Scope

- Lots of features to implement
- Deadlines
- Ideas constantly changing
- Application evolves with development

Solution

- Weekly TA meetings
- Online communication
- Cut excess

Testing User Interaction on LocalHost

- Couldn't have multiple users logged in at the same time
- Couldn't test features across multiple devices

Solution

- Create multiple testing accounts to simulate interaction
- Retest features once website was deployed to ensure functionality

Future Scope/Enhancements

1. Add more mini-apps
   - E.g. Concerts, travel, ...
   - Appeal to more audiences
   - Foster more user communication
2. More ways for interaction between users
   - Groupchats
   - Forums/message boards
3. QoL Improvements
   - Real-time chat
   - Smoother loading
   - Dashboard widgets
